Spatial Database Research and PhD Opportunities at Singapore Management University

Abstract: The talk is about research results on spatial databases and about PhD opportunities at the SIS. The presentation will start with basic information about Singapore, SMU and SIS. Following that, an overview of recent research projects on spatial databases will be given. The latter part will focus on the PhD programme at SIS, the full scholarship support to PhD students, and the key features that make it distinct from PhD studies elsewhere. A mention will be made to the Living Analytics Research Centre, the opportunities it offers to PhD students, and the option to conduct part of their thesis research at Carnegie Mellon University. The talk will continue with employment opportunities for PhD graduates, and conclude with questions from the audience.
